

To whom it may concern:

I was very concerned to hear of the new Low Power FM which may replace the existing FM Translator Service. I know that many things are done in the name of progress, but in this situation it would be to the detriment of the K-LOVE radio station in my local area. K-LOVE represents the type of values that this nation and I personally hold dear. It is the only station I feel comfortable listening to with my 11 and 9 year old in the car. The alternative is unacceptable for children this age to listen to, frequently discussing issues such as sex, drugs and gun usage in the lyrics of songs or by announcers. This is numbing the minds of children, our future leaders. By replacing the FM translator service you will be removing K-LOVE the only alternative station available in this area. I believe in the freedom of speech, religion and of the ability to make those choices for ourselves. I am NOT asking for other stations to be removed. I am just asking that my right to choose not be affected by the removal of the FM translator service and affectively the K-LOVE radio station.
